- QR (Quick Response), AR (Augmented Reality), text key codes are allowed. However, although ESMO accepts that these may go to a commercial/branded website, we suggest avoiding links to websites containing blatant product advertising. - Posters may not present a commercial bias or use clearly identifiable commercial templates. The ESMO Sarcoma and Rare Cancers Congress 2025 reviewers will be responsible for advising the Scientific Committee of any inappropriate commercial bias, promotion or branding unless clearly stated in a balanced and objective manner.

DESIGN

- **Layout:**
 - Format of the Poster is **vertical (portrait)**. The maximum Poster size is **width 90 x 120 cm height**.
→ *Please note that Posters bigger than the size indicated are not allowed to be hanged on.*
 - Keep data on the slide simple and ensure a logical order of the content. A clear and well-structured arrangement is the most attractive and the easiest to read.
- **Text:** Your guiding principle should be *"As much as necessary, as little as possible"*. The text should be concise and to the point, key facts may be highlighted.
- **Colours:** Colours should be used sparingly. Choose colour combinations that make your text easy to read (preferably dark background – light fonts; avoid red and green).
- **Images:** It is recommended that you collect your illustration material well in advance. Do not select too many images and concentrate on those which support your key points and conclusions optimally.
